## EDUCATION

### Lambton College

*Post Graduation in Full Stack Software Development*

Toronto, ON

May 2024 – Dec. 2025

### Safi Institute of Advanced Study (Calicut University)

*Bachelor of Computer Applications*

Kerala, India

Jun. 2019 – Apr. 2022

## EXPERIENCE

### Product Engineer

*UnitVilla*

May 2025 – Present

Vancouver, BC (Remote)

- Built cross-platform full-stack apps with React Native, Next.js, Node.js, and Python for web/mobile users.
- Designed scalable FastAPI + MongoDB backends, cutting response times by **40%**.
- Automated workflows with OpenAI & LangChain, reducing manual effort by **60%**.
- Shipped production-grade real estate tools that improved user engagement across WhatsApp & web.

### Backend Developer

*Agua India*

Sep. 2023 – Jan. 2024

Kerala, India

- Engineered backend to support **20,000+** users across major Indian cities.
- Boosted delivery time efficiency by **20%**, improving customer satisfaction by **25%**.
- Designed internal dashboards, increasing sales productivity by **40%**.
- Collaborated with business teams to align backend logic with operational goals.

### Junior Backend Developer

*Cynbus*

Aug 2022 – Aug 2023

Kerala, India

- Built and maintained APIs using Django, serving e-commerce, e-learning & tracking platforms.
- Improved DB query performance, cutting latency and improving app speed by **30%**.
- Contributed to client projects via data migration, schema optimization, and logic refactoring.

## PROJECTS

### Grocity.ai | Python, FastAPI, Meta Cloud API, Gemini AI, MySQL

June 2025 – Present

- Enabled **10** users to plan meals weekly via WhatsApp, reducing meal prep friction.
- Auto-generated grocery lists from chosen dishes using Gemini API and a structured MySQL backend.
- Integrated with FastAPI, supporting a response time of **less than 500ms** for **90%** of user interactions.
- Designed flexible meal flows, letting users choose dishes for 21+ meals/week while supporting real-time exits and edits.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, SQL (MySQL, PostgreSQL), HTML/CSS

**Frameworks:** FastAPI, Django, Node.js, Express.js, React, React Native, Next.js

**Databases:** MongoDB, PostgreSQL, MySQL, PostGIS

**AI/ML Tools:** OpenAI API, LangChain, Gemini API, scikit-learn (in progress)

**Developer Tools:** Git, Docker, CI/CD, AWS (EC2, S3), DigitalOcean, Postman, Vercel, Notion, Figma

## LEADERSHIP & VOLUNTEERING

### Founder – TinkerHub SIAS | Community Building, Technical Mentorship

2021-2022

- Built a student tech community of **80+ members**, organizing **10+ workshops** on dev tools and peer mentoring.

### Microsoft Learn Student Ambassador | Developer Advocacy, Outreach

2020 – 2022

- Led **5+ hands-on sessions** on Git, cloud, and web dev; collaborated with MLSSA peers across **3+ campuses**.
